

## Important: Please Note

If you received a net with a loop in the top strap AND a small loop in the bottom strap, connect the extra strap with loop (which is approximately 3ft in length) to the bottom strap as shown below.

If the lower strap does not have a loop, or the extra strap is pre-installed, please proceed with installation as shown in the manual.

Install the extra strap with loop through the loop in the bottom strap. Then feed the extra strap through the loop on the opposite end of the strap. Pull tight, and extra strap will now be connected to the bottom strap. You are ready to install the net. For questions, contact JumpSport customer service.
