Assembly and Installation Instructions

The AlleyOop 10ft x 17ft Rectangular Trampoline Weather Cover is designed to protect your investment from UV rays that harm the jumping mat and pad, and to keep debris off of your trampoline. Make sure to brush debris off of the weather cover so that the mesh screen near the center can act as a drain for moisture.

The following pages contain diagrams, pictures, and written instructions for installing your Trampoline Weather Cover.

Familiarize yourself with the Assembly and Installation Instructions before beginning installation.

Windy Conditions

It is possible for the trampoline to be blown about by a high wind, with or without a weather cover installed. If you anticipate high winds, see trampoline manufacturer's recommendations for windy conditions.

Cold Weather Protection

The Trampoline Weather Cover is designed for year-round outdoor use. However, in climates of cold weather, we recommend the Trampoline Weather Cover be removed if snow or ice is anticipated. To remove the Trampoline Weather Cover, simply follow the instructions for installing it in reverse order.

 **WARNING:** *Do not jump on the trampoline with the weather cover installed.*

Assembly and Installation Instructions

1) Lay weather cover on trampoline.

2) Detach Velcro slits at each of the 12 locations on the weather cover. Slide each section under the safety enclosure net, and around the button bungees. Then, from outside the trampoline, reattach all Velcro slits.

Note: The net should remain connected to the pad at all 12 points (12 button bungees). These connections should align with the Velcro slits. Readjust any button bungee connections on the net itself that do not line up with the Velcro slits.
