

**1)** Familiarize yourself with the leg pieces (leg and leg cap) and the Allen wrench/drill bit. Leg hardware (leg bushing, lock washer, Allen bolt, and leg plug) may already be installed and covered by the leg plug.

**Note:** Keep Allen wrench to remove leg mounting bolts and retighten or re-tighten legs, as needed. All bolts should be tight prior to using the rebounder trampoline.

**2)** The handle legs will be installed in place of the normal legs at the two locations shown below. (For safety, if you have a folding trampoline, ensure the hinge is between the two handle legs, as shown below). Turn trampoline upside-down and fit leg sockets over stud on trampoline frame. Notch in leg socket lines up with pin on stud. Securely tighten Allen bolts with supplied 6mm Allen wrench. Be sure the Fitness Trampoline logo is centered between the 2 handle legs. When all legs are installed, turn your rebounder over.

**IMPORTANT:** Be sure leg caps are installed securely over bottom of legs, as shown above.

2) Connect side handles to top handle, and secure with small thumb screws to create a “top assembly”.

3) Lower top assembly into handle legs. *You may have to rotate entire top assembly 180 degrees for holes to line up.* Adjust height as necessary, before securing with both large thumb screws.

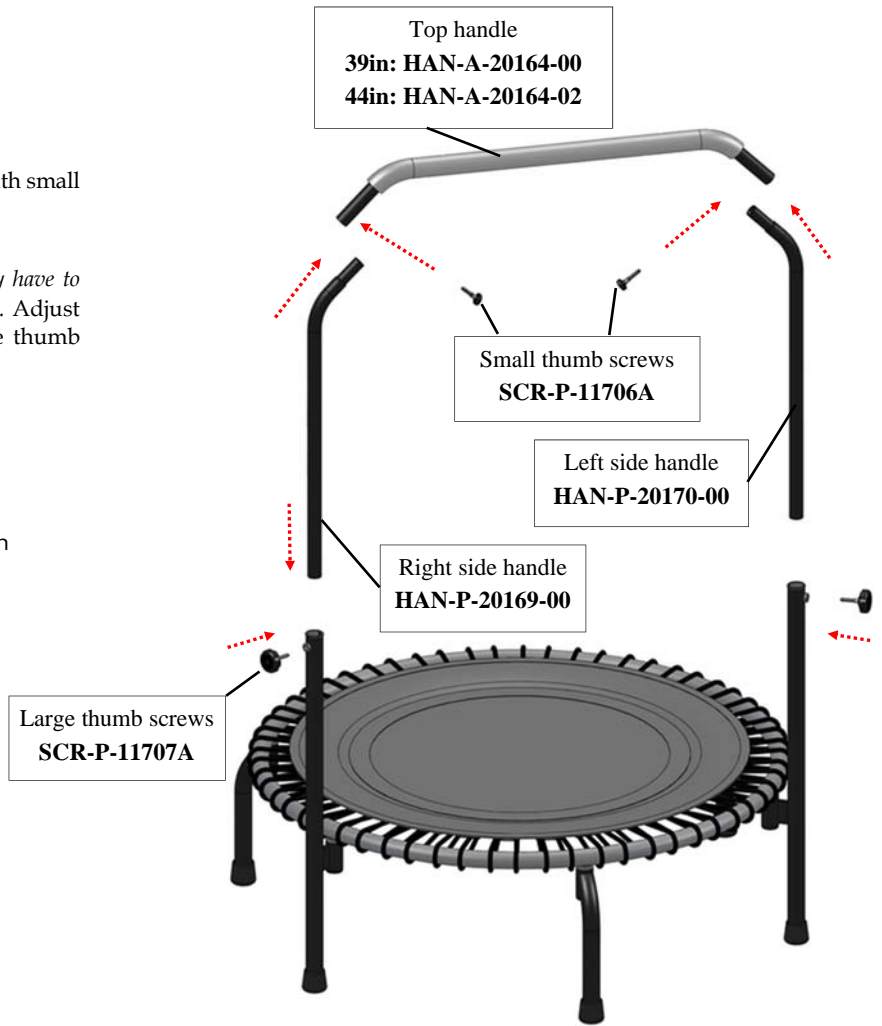

**Your exercise handle bar  
is now installed!**

To remove the handle, follow the installation instructions in reverse order.

**CAUTION**

**Avoid Injury.**

Exercise handle bar (when attached to the rebounder) is not designed to support your entire weight. It is to aid with balance and provide exercise versatility.
