Assembly Instructions

Universal Trampoline Frame Pad Builder Kits (Standard & Deluxe)

Standard Components

- A. 8 Foam Inserts
- B. 8 Vinyl Covers
- C. 16 Pad Connectors
- D. 16 Button Bungee T-Anchors

Deluxe Components

- A. 8 Long Foam Inserts
- B. 16 Short Foam Inserts
- C. 8 Vinyl Covers
- D. 16 Pad Connectors
- E. 16 Button Bungee T-Anchors or 8 Pad Connector Bungees

To Install Standard Foam Kit:

Step 1 - Lay Out Each Section

Lay out the standard pad foam and cover as pictured with the hook and loop opening on the underside of the pad cover facing up. The circular cutout in foam will be positioned under the grommet holes in the vinyl cover. The shorter layer of foam will be facing up so that the longer layer of foam will be closer to the top of the pad once assembled.

Step 2 -Insert Each Section

Insert the foam into the cover and adjust so the foam is flat and cutouts in foam are lined up with grommet holes in the cover.

Proceed to Button Bungee Instructions

To Install Deluxe Foam Kit:

Step 1 - Lay Out Each Section

Lay out the Deluxe pad foam and cover as pictured with the hook and loop opening on the underside of the pad cover facing up. The circular cutout in foam will be positioned under the grommet holes in the vinyl cover.

Step 2 -Insert Short Foam

Insert the 2 shorter foam pieces into either end of the cover section so the cutout is around the grommet hole.

Step 3 - Insert Long Foam

Insert center section of foam and adjust so all pieces lie flat and cutouts in foam are lined up with grommet holes in cover.

Proceed to Button Bungee Instructions

If your kit has 16 button bungee t-anchors and grommet holes on the pad cover, follow the instructions below. If not, skip to **Install Pad Connector Bungees** on page 4.

To Install Button Bungees (for both standard and deluxe):

Step 1 - Close Velcro Sections

Close Velcro to enclose foam and assemble button bungee as shown threading one "button" onto ends of bungee

Step 2 - Attach T-Anchor Bungees

Put the end of bungees through the grommet hole to the other side of the pad.

Step 3 - Install "Buttons"

Flip pad section over and install "button" to the loose ends of the bungee on the other side.

Step 4 - Secure Loose "Button"

Tie bungees over button.

Proceed to Pad installation on Trampoline.

Pad Installation:

Step 1 - Secure To Trampoline

Place assembled pad sections on the trampoline and orient them so that the openings in flaps on the outside edge of the pad skirt, or the end of the pad sections, line up as closely as possible with the trampoline safety enclosure poles. This might not be possible at every pole due to different trampoline configurations. Connect the sections into a circle using the Pad Connectors below and above the end of each pad section. Secure each pad section to trampoline by pulling the T-Anchors underneath the pads around the frame of the trampoline and securing the toggle.

To Install Pad Connector Bungees:

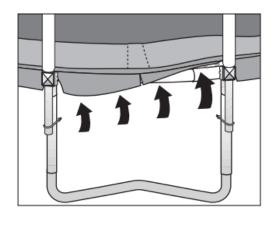

Step 1 - Install Pad Bungee

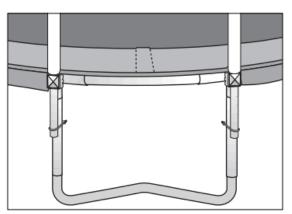

Install pad connector bungees through the 2 metal grommets near outside edge of pad, as shown. Grommets should be on bottom side of pad between legs.

Step 2 - Tuck Pad Skirt

Lift frame pad between poles 1 and 2. Tuck pad skirt up underneath pad, so skirt is wedged between bottom of pad and rail of trampoline.

Step 3 - Secure Net with Pole Straps (purchased separately)

Wrap 10.5ft pole strap around rail and through bottom strap of outer panel of net. Continue wrapping pole strap around the rail and bottom strap of net until you get to pole 2. Do not wrap pole strap around net mesh, only around bottom strap of net. 10.5ft pole strap should wrap once around rail between each spring before getting to pole 2. Secure at pole 2 with a strong knot. Note: When you are done, the strap should be wrapped and tied so that there is no excess hanging. >> Repeat steps 14 and 15 at all other poles around trampoline, until all 8 sections of net are secured to frame of trampoline.
