JumpSport Customer Service phone #: 408-213-2551

Installation requires
a hex or crescent
wrench
(not included)

1) Orient one Side Rail piece as shown. Place Nut Plate inside Rail, with flat side against the Rail, and align as shown. Note: the entire assembly can also be performed on the ground.

2) Align holes of a Wheel Assembly Plate with Side Rail and Nut Plate. **Hand tighten** two hex Bolts to connect the Side Rail, Nut Plate, and Wheel Assembly.

4) Fit Corner Bumper Cap into outside edge of Side Rail, holding it in place if necessary. Slide a second Side Rail between the Nut Plate and Wheel Assembly Plate, and fit into Corner Bumper Cap, so that it butts up with the other Side Rail. Install remaining Bolts by hand.

5) Use an adjustable crescent or socket wrench to snugly tighten down all 4 bolts, making sure edges of Side Rails are aligned and flush, to eliminate any gaps.

5) >>>Repeat Steps 1-5 with all remaining pieces. **IMPORTANT: 2 Wheel Assemblies have built-in wheel locks. These 2 wheels should be installed adjacent to each other.**

**The Fitness Trampoline Cart is now ready for use!
Periodically check to make sure all bolts are tight.**
