

Installation Instructions for PlyoFit™ Pro Adapter

Installation Steps:

1. Turn the trampoline upside down.
2. Install *angled* foot caps **over** two adjacent leg caps. If you have a folding trampoline, ensure one of the hinges is between the legs.
3. Remove the remaining leg caps and slide the *long* foot caps over the legs.
4. **Set telescoping tube assembly to lowest setting. The PlyoFit Pro is non-adjustable.**
5. Insert the tube and leg assemblies onto the *long* foot caps as shown above.
6. Remove the "L" sockets and base feet from the cross tube of the PlyoFit base.
7. Slide the two Center Support rails onto the Cross Tube, ensuring the "L" of the Center Support Connectors is facing inward.
8. Reassemble the PlyoFit base. If you have a 44 inch trampoline, you must install the longer Center Supports onto the Center Support Connectors and add the 44 inch PlyoFit Extender to the Base Assembly.
9. Slide the Pro base assemblies through the open center support connectors and connect the two halves with the snap button.
10. Slide the completed base assembly onto the legs. Make sure all pieces are snug.
