

Assembly Instructions

Universal Trampoline Frame Pad Builder Kits (Standard & Deluxe)

Standard Components

- A. 8 Foam Inserts
- B. 8 Vinyl Covers
- C. 16 Vinyl Connectors
- D. 16 Button Bungee T-Anchors

Deluxe Components

- A. 8 Long Foam Inserts
 - B. 16 Short Foam Inserts
 - C. 8 Vinyl Covers
 - D. 16 Vinyl Connectors
 - E. 16 Button Bungee T-Anchor
-

To Install Standard Foam Kit:

Step 1 - Lay Out Each Section

Lay out the standard pad foam and cover as pictured with the Velcro opening on the underside of the pad cover facing up. The circular cutout in foam will be positioned under the grommet holes in the vinyl cover. The shorter layer of foam will be facing up so that the longer layer of foam will be closer to the top of the pad once assembled.

Step 2 - Insert Each Section

Insert the foam into the cover and adjust so the foam is flat and cutouts in foam are lined up with grommet holes in the cover.

Proceed to Button Bungee Instructions

To Install Deluxe Foam Kit:

Step 1 - Lay Out Each Section

Lay out the Deluxe pad foam and cover as pictured with the Velcro opening on the underside of the pad cover facing up. The circular cutout in foam will be positioned under the grommet holes in the vinyl cover.

Step 2 - Insert Short Foam

Insert the 2 shorter foam pieces into either end of the cover section so the cutout is around the grommet hole.

Step 3 - Insert Long Foam

Insert center section of foam and adjust so all pieces lie flat and cutouts in foam are lined up with grommet holes in cover

Proceed to Button Bungee Instructions

To Install Button Bungees (for both standard and deluxe):

Step 1 - Close Velcro Sections

Close Velcro to enclose foam and assemble button bungee as shown threading one "button" onto ends of bungee

Step 2 - Attach T-Anchor Bungees

Put the end of bungees through the grommet hole to the other side of the pad.

Step 3 - Install "Buttons"

Flip pad section over and install "button" to the loose ends of the bungee on the other side.

Step 4 - Secure Loose "Button"

Tie bungees over button.

Proceed to Pad installation on Trampoline.

Pad Installation:

Step 1 - Secure To Trampoline

Place assembled pad sections on the trampoline and orient them so that the openings in flaps on the outside edge of the pad skirt, or the end of the pad sections, line up as closely as possible with the trampoline safety enclosure poles. This might not be possible at every pole due to different trampoline configurations. Connect the sections using the Vinyl Connectors (C) below and above each connection point. Secure each pad section to trampoline by wrapping the T-Anchors underneath the pads around the frame of the trampoline.
