Assembly and Installation Instructions

Thank you for purchasing a Jump2it GameMat!

The following pages contain diagrams, pictures, and written instructions for installing your Game Mat.

Familiarize yourself with the Assembly and Installation Instructions before beginning installation.

If you already have a mat connected to your trampoline, completely remove the mat and all springs before continuing to next page.

Assembly and Installation Instructions

1) Connect jumping mat to trampoline frame using 4 springs. Connect each spring to a V-ring and spring notch, approximately 1/4 circle apart from each other. Warning labels must face up.

Note: For this Step, the springs do not have to be perfectly spaced. They are to help keep tension on the mat temporarily while you attach the remaining springs.

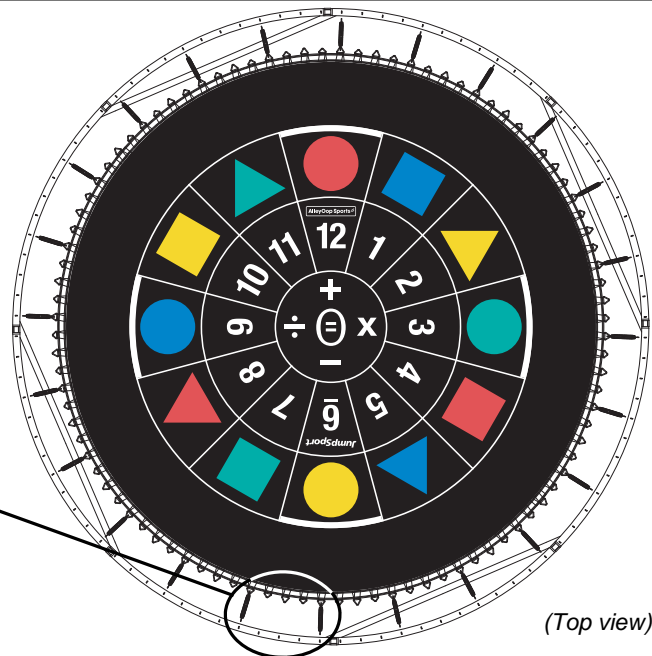

TIP: For easy spring installation, connect spring to V-ring of mat and pull toward you, to connect to frame. Use a second spring as a tool to hook onto the one you are installing.

IMPORTANT: If you have a PowerBounce Trampoline, open the separate PowerBounce box and use those instructions to install the PowerBounce springs while you install the standard springs in the following steps.

2) Start at a spring that is already connected. While standing outside the frame, count 4 V-rings and spring notches clockwise, and connect another spring. The easiest way to connect a spring is to hook spring onto V-ring, then pull it toward you and hook it into spring notch on top of frame rail.

3) Continue counting 4 V-rings and notches and connecting a spring until you have gone all the way around the trampoline.

When you get to a spring that you connected in Step 1, reposition it if necessary, so that the springs are all spaced exactly 4 V-rings and spring notches apart.

Assembly and Installation Instructions

4) Now connect a spring to every middle V-ring and spring notch, working clockwise around the trampoline. Have someone work across from you, also going clockwise.

Note: It is important to have someone working across from you. Otherwise the springs could become over-extended, causing them to become difficult to attach.

5) Connect all the remaining springs to the trampoline, again working clockwise, with someone working across from you.

Your Jump2it GameMat is now completely installed and ready for use!

WARNING: Trampoline use is not recommended without the frame pad installed. The frame pad is designed to reduce the possibility of injury by protecting the user from coming into contact with the frame and springs of the trampoline. It is very important that you properly and securely attach the frame pad to the frame, and that it is in the correct position prior to using the trampoline.
